RE: Temporary cessation of operations
Wellington Preperation Plant
ACT/007/012, Carbon County

Dear Mr. Braxton

This letter constitutes notice that the Wellington Preperation Plant is in a state of temporary cessation that will extend beyond 30 days as defined in UMC 817.131. There are 392 acres of surface disturbance presently in the permit area of which 3 or 4 acres west of the slurry ponds has been reseeded. During the period of cessation, activities will be limited to water monitoring, environmental monitoring, inspection of surface facilities, and irrigation of the test plots. We are requesting that water monitoring requirements be limited to annual sampling of the water wells and biannual sampling of perennial streams. Sampling of operational points such as slurry pond discharge would not be needed because the ponds will be dry or will only have limited flow because of precipitation. All discharge events going outside the permit area would be sampled during the event. If this monitoring plan is acceptable to the Division, please respond within the next few weeks.

See let's discuss LPB 15 April

Sincerely,
Kaiser Coal Corporation

Douglas C Pearce
