RE: Corrected Table 2 - Phase III Partial Relinquishments of Federal Coal Leases SL-070645/U-02292, U-040151, U-083066, U-084923, U-084924 and U-1358

ACT/015/017 #2 ACT/015/018 #2
ACT/015/019 #2

Dear Ms. Anderson:

In response to your letter of May 12, 1997, wherein you've brought to our attention some discrepancies in the legal descriptions of retained lease acreage, enclosed is a corrected Table 2 (Revised 5/22/97) for insertion into the loose leaf binder. Please remove and discard the original Table 2.

For clarification purposes of federal lease U-1358, the retained acreage should be 120 acres rather than 130 acres, as mentioned in you letter. In the Supplemental Information submitted June 12, 1995 (Revised 6/4/96), page 2 item 4, the partial relinquishment of this lease was amended to include an additional 10 acres, thus relinquishing the N½S½NE¼SE¼ of Section 22, T. 17 S., R. 7 E., S.L.B.&M.

We sincerely appreciate your early initial review of this document and bringing to our attention the errors in the legal descriptions. Hopefully, this corrected Table 2 will now adequately reflect the disposition of the partially relinquished acreage of the referenced federal coal leases.

Should there be any other items needing correction or should you have any questions, please feel free to contact me at 801-220-4612.

Respectfully,

Scott M. Child
Property Management Administrator

TOTAL			2,625.66			

* 250.00 acres relinquished 4/22/92. SL-070645/U-02292 original lease acreage was 2,560.00.
** 160.00 acres relinquished 4/22/92. U-1358 original lease acreage was 320.00

The following information is submitted on behalf of PacifiCorp based upon experience from earlier relinquishment submittals; the development of the Memorandum of Understanding ("MOU"), No. 10-MOU-97-001, between the regulatory agencies (BLM, U.S. Forest and DOGM) dated September 12, 1996 and to provide lease–specific information to the regulatory agencies as it relates to the *"substantially stabilized"* issues on areas of mining–induced subsidence. Summary descriptions of hydrologic and vegetative impacts are also included. The parameters for determining *"substantially stabilized"* have been developed through the MOU process. The term, however, is undefined by regulation. In a concerted effort with the regulatory agencies, this information has been prepared to demonstrate the disposition of subsidence activities within the East Mountain LMU.
