Good morning Mr. Johansen,

We received your comments to the public outreach letter and want to thank you for taking the time to respond.

We appreciate your water replacement concerns and take them seriously. Our staff hydrologists work hard to evaluate potential impacts as a result of coal mining activity. The complexity of the groundwater systems in Carbon and Emery Counties can't be understated so we continue to look for ways to better understand the relationships of a given mine plan on the area's groundwater resources/systems, particularly in areas with extensive fractures and faulting.

Regards,
Steve
