Re: Addendum (#2) for Covol's Amendment for the Wellington Refuse Basin Mining and Wash Plant Operation, ACT/007/012-97H

Dear Daron:

As we have discussed, Covol requests that they be allowed to begin pumping from the River Water Collection Well and/or the river diversion to the River Pumphouse at the above operation. I have reviewed the most current version of the MRP to determine if this activity was ever changed from using these facilities as they were originally intended and approved. My research led me to change just one page, Section 5.26, page 10 which is enclosed. It would appear that this activity could be allowed while your staff is completing their review of 97H. If so, please notify us as soon as possible so that this important task can begin.

Also requested is the permission to optimize the location of the pipeline which delivers water to the flotation cell area. I have revised two maps to show a slight alignment change which will actually disturb less ground than was previously approved by 97G. This submittal also includes updated pages for Chapter 2, Section 2.22.

Three copies of this replacement information are enclosed along with the appropriate C1 and C2 forms to help expedite your review. If you have any questions, please contact Steve Brown at (801) 768-4481 or me at (801) 943-4144. Thank you.

Very truly yours,

Tim

Tim Thompson, P.E.
