The 11th West Sump sample location is just south of the 11th West mine. The sample is collected from a sump near the floor. The sump is considered a water source for mine operations. The sump is likely to be a significant source of water for the mine operations.

Area A:
11th-17th West
Sealed 4/22/08
Groundwater Production Rate = 300 GPM

Area B:
7th North Seals
Sealed 3/2/15
Groundwater Production Rate = Zero GPM (Area Stabilizing)
