MEMO TO COAL FILE

RE: Gordon Creeek #2 CHIA
Beaver Creek Coal Company
ACT/007/016, Folder No. 2
Carbon County, Utah

This memo is to document a phone conversation with Scott Grace of the Office of Surface Mining, Western Technical Center on April 19, 1984. Mr. Grace informed me that he had finished revising the summary of the Cumulative Hyrologic Impact Assessment for the Gordon Creek #2 permit. In addition Mr. Grace indicated that Mr. Walt Swain of the OSM Western Technical Center still had problems with the CHIA summary and would be delaying it even further.

Mr. Swain's concern centered around the fact that the Gordon Creek #2 Mining operation imports water into the mine to be used at the working face for dust suppression. Mr. Swain apparently indicated that now the situation would have to be reviewed by the appropriate individual from MSHA.
