Chris,
The extension of time seems reasonable to me. The as-built drawings are now due by December 31, 2015. Thanks. Daron

Daron:

Bowie Resource Partners, LLC hired Nelco Contractors this fall to complete the repair of Ditch SD-6 at Gordon Creek. Nelco completed their work shortly before November 15th. As the construction was being completed, the first of a series of snow storms blanketed the area with several inches of snow and created snow drifts several feet deep over the lower portion of the repaired channel. Rich White and I were finally able to successfully survey the channel late last week and EarthFax is preparing as-built drawings of the channel repair.

The purpose of this email is to request additional time to prepare the as-built drawings for the drainage repair. I believe an additional 14 days will be sufficient to complete and submit the required information. Please let me know if this is acceptable to the Division.

Thanks,

Chris D. Hansen
