Thanks for sending that Keenan and closing the loop with the Stream Alteration Permit.

Hi Daren,

The contractor completed reclamation of the Horizon coal mine earlier this month and reestablished the natural open channel of the North Fork of the North Fork of Gordon Creek, in Carbon County, as approved under the Stream Alteration Permit Number 18-91-03SA. I submitted the Compliance Certification to your office today and have included a date stamped copy of the Compliance Certification to this email. I've also attached photos of the site pre- and post-construction.

Thank you,
Keenan Storrar
