Department of Natural Resources
Division of Oil, Gas, and Mining
1588 West North Temple
Salt Lake City, Utah 84116

Dear Mr. Daniels,

Confirming our meeting and discussion in your office on July 17, enclosed is a modification of Valley Camp's Belina No. 1 Mine grading plan as approved October 8, 1976. Please note the additions of the sewage treatment plant area as required by the Utah Dept. of Health rather than the septic tank and leach fields as provided by the original plan, and the settling pond in the lower part of Wiskey Canyon as now required by O.S.M. regulations. In the Belina No. 1 Mine site plan, as approved, slopes were projected on 1.5:1 grades. Now to comply with current permanent O.S.M. regulations, slopes of 2:1 will be projected, where feasible.

As we discussed, Golder Associates has been retained to develop a final site grading plan to bring the Belina Mine area in compliance with O.S.M. permanent regulations. As this plan progresses, you and your office will be kept informed and solicited for comments and recommendations. This site grading plan, together with the Vaughn Hansen & Associates Compliance Survey, previously furnished for your review, with your comments incorporated will constitute Valley Camp's plan for bringing our mine area into compliance with the O.S.M. permanent regulations. As we discussed, this work is all in progress so as to accomplish compliance at the earliest feasible date. The work, while in progress, can be modified to reflect your in-put.

If we may provide any additional information prior to completion of Golder Associate's plan, please call on us.

Sincerely,

Edwin B. Foust
Edwin B. Foust
Chief Engineer
