Re: Signs & Markers

Dear Mr. Smith:

As part of our continuing effort to bring our mine area into compliance with the Permanent Regulatory Program and as part of our "Area Compliance Survey", performed by Vaughn Hansen Associates, the following is a description of the signs we intend to install in conjunction with the specific sections 817.11 (g) and 817.114.

1. 817.11 (g) markers shall be metal signs approximately 24" x 20" in size, mounted on steel posts. Wording and coloring shall be similar to that on the enclosed drawing. There shall be posted only one (1) sign per area.
2. 817.114 markers shall be metal signs approximately 24" x 17" in size, mounted on steel posts. Wording and coloring shall be similar to that indicated on the enclosed drawing. There shall be posted only one (1) sign per area.

These type signs will be used at both the Utah #2 and the Belina #1 mine sites.

It is our hope these markers will meet with your approval and permission to proceed with installation will be issued shortly.

Sincerely,

Trevor G. Whiteside
Senior Mine Engineer
