Ron,

NOV's were issued on 10-1-80

NOV #1 - 717.14 (a) (1) - sidecasting spoil on downslope

static safety factor data submitted to Div. 10-22-80 for abatement. Variance not granted until Lee has had time to verify data (initially it looks good)
Abatement required by 8 AM 10-31-80 (for variance from Div.) should have been for submission of data and request for variance, not actual issuance by Div.

NOV #2 - 717.20 (a) - failure to protect topsoil

Abatement required 8 AM 10-31-80
Don't know when this was taken care of, but I think it has.

NOV #3 - 717.17 (a) - failure to pass surface drainage thru sed. pond

Abate. req. 8 AM 10-31-80
Call from Mr. Harvey 10-28-80 8:30 AM ready for inspection & abatement workdone

(over)

Don't know what assessments have been made.
