Dear Mr. Smith:

Re: Noxious Weed Concerns, Blazon #1 Mine, ACT/007/021, Folder #2, Carbon County, Utah

During a technical inspection of the Blazon mine site on May 2, 1989 it was noted that several bales of straw had been scattered over seeded areas of the site. Since there was evidence of field bindweed (a state designated noxious weed) in the scattered straw, a sample of the straw was collected and sent the the State Department of Agriculture for analysis. Their report (copy attached) showed viable seed from two species of noxious weeds and one species of restricted weed in the straw sample.

Pursuant to UMC 784.13(b)(5)(v), NAE must develop and implement a weed control plan to control these regulated weeds (field bindweed, quackgrass and wild oats). A complete and adequate plan must be submitted to the Division for approval by June 1, 1989.

Please don't hesitate to call should you have any questions.

Sincerely,

Susan C. Linner
