September 23, 1988

TO: File

FROM: Randy Harden, Reclamation Engineer

RE: Permit Modifications, Summit Coal Company, Boyer Mine, ACT/043/008, Folder #2, Summit County, Utah

SUMMARY

Permit modifications as a result of the Division's request in a letter dated June 13, 1988 was submitted by the operator on July 14, 1988. The following comments regard that submittal.

ANALYSIS

Incorporation of the disturbed area caused by the mine fire will require the addition of that area into the bonded area for the mine. Revisions required shall include the following:

1. Complete and return the enclosed Reclamation Agreement.

2. Submit a certified map showing the disturbed area boundaries and acreage for the permit as required in the Reclamation Agreement.

3. No change in the bond amount will be required by the operator at this time. Pending reclamation work on the site should offset any increase in the bond area included from the mitigation of the fire.

4. In the event that no reclamation of the fire area or the powder magazine pad and access road occur as indicated in the plan and modifications to the plan, bonding requirements for the site will be re-evaluation and a new bonding amount will be determined by the Division.

The Reclamation Agreement provided is a new requirement of the Division in compliance with the requirements for bonding and insurance. At such times when operators are required to revise bonding and insurance requirements, this form shall be completed by all operators when such revisions are required involving bonding.

The operator shall submit the Reclamation Agreement to the Division on or before November 15, 1988.
