RE: Requirement to Amend Reclamation Plan, North American Equities, Blazon #1 Mine, ACT/007/021, Folder #2, Carbon County, Utah

On October 25, 1989, the Division notified Bill Prince, representative for NAE, of the need to cover and revegetate a small amount of underground development waste material placed on the north side of Little Snyder Canyon. The work was to be done by October 31, 1989 and a revised Plate 1 was to be submitted by November 30, 1989.

Reclamation of the site was completed as required on November 16, 1989, after the issuance of an NOV for failure to complete the work by October 31. To date the plan has not been updated through submittal of the revised map.

I spoke to Bill Prince and Carol Bjork of Earthfax Engineering in early January about the requirement for the map resubmittal. On February 2, 1990, I again contacted Bill Prince to determine the status of the submittal. Bill informed me that no submittal was forthcoming as Alan Smith of NAE had not authorized money to be spent to prepare the map. The Division should consider enforcement action if the map is not submitted by February 28, 1990.
