**RE: <u>Green River Potash Exploration Plan is Complete</u>**

Dear Mr. Glasscock:

Your Exploration Plan to drill exploratory core holes under the Green River Potash Exploration Project in Grand County, Utah was received in this office on January 7, 2013. Consistent with the leasing of solid minerals other than coal regulations at 43 CFR 3505.45, the BLM has reviewed the Plan and has determined that the filed Exploration Plan is complete. Note this notification does not constitute authorization to commence operations nor is the submission of a complete Plan necessarily adequate to meet the performance requirements of the regulations and avoid unnecessary and undue degradation.

Be advised the next step in the review process is for the BLM to initiate an environmental analysis as required by the National Environmental Policy Act. The BLM will begin coordinating the environmental analysis with Smiling Lake Consulting, Inc. per the Memorandum of Understanding signed on September 4, 2012.

If you have any questions please contact Rebecca Doolittle at (435) 259-2141.

Sincerely,

Beth Maclean
