MMS - 8/20/82

Tim Abbing - about J. Harvey Exploration

He did not know that DOGM is regulatory agency on private land. Thought that the applicant could do what he wanted on private land.

They looked around the area, thought the road would be on an awful steep hillside. Some elk habitat but MMS did not call in USFWS for consultation.

Tim will send copy of their ~~approval~~ stips letter to me - They are still waiting for permission from landowner, esp. with a road as steep as expected.

Call from J. Harvey -

Re: My letter dtd 8/18/82 to J. Harvey concerning exploration plans in section 12, T13S, R8E

He was very upset about my request of additional information, talked about calling the Governor, felt he was being picked on because it was a small operation. Something to the effect the Getty Oil wouldn't have a problem. I explained we would do the survey to satisfy USFWS questions if he would supply additional info on question 1-5.
