RE: Construction Permit
C.V. Spur Pond

Dear Mr. Guy:

The Utah Bureau of Water Pollution Control has reviewed the plans and information for the Beaver Creek C.V. spur preparation plant pond near Price, Utah. Information received March 2, and data of samples collected March 3, 1983 were reviewed.

As a result of our review, the plans for this pond are approved. A construction permit as constituted by this letter is hereby issued provided the pond slopes are no steeper than two horizontal to one vertical.

The pond is to have approximately 0.62 acre feet capacity for the containment of 40 gpm preparation plant water in the event of recirculation problems. The pond is to be excavated 130 by 40 feet and 7 feet deep. The water is to be later recycled to the plant so there will be no discharge of plant process water.

Please contact this office if further communication regarding this system is necessary.

Sincerely,

UTAH WATER POLLUTION CONTROL COMMITTEE

Calvin K. Sudweeks
Executive Secretary
