RE: Refuse Disposal
C.V. Spur Loading Facility
ACT/007/022 #3
Carbon County, Utah

Dear Mr. Braxton:

Pursuant to my discussion with John Whitehead, Beaver Creek Coal Company is requesting approval to extend the perimeter of its refuse disposal area at C.V. Spur. The perimeter will be extended to the north and east of the existing north east corner of the pile, as shown on the attached map.

The purpose of the extension is to allow us to use refuse to build up an existing low area to allow for proper drainage to the ponds. This area will be filled to a depth of 1' to 4', compacted in 12" lifts, and graded to allow for drainage. The area to be filled is classed as disturbed area, therefore no removal of soil will be necessary. The proposed final reclamation of this area will be as per that for the refuse area in the approved M.R.P.

It is our hope this proposal will meet with your approval. If you have any questions, or need any further information, please let me know.

Respectfully,

Dan W. Guy
