Re: Inspection - July 11, 1980

Dear Mr. Hedberg,

Pertaining to your inspection of July 11, 1980 of the Belina Mine area and your subsequent letter of August 8, 1980, wherein you proposed certain abatement measures and deadlines for correction of Violations of Rule MC 717.17(a), the following is remedial action taken for the purpose of abatement.

Violation - Failure to pass surface drainage from the disturbed area thru sediment control facilities.

Part 1: Pumphouse area below sediment pond.

ABATEMENT: Berm constructed around outer edge of pad and small retention pond constructed on lower end of pad.

Date of Abatement: August 22, 1980  
~~9-12-80~~ *by 8/30/80*

Part 2: Access road adjacent to substation

ABATEMENT: Berm constructed along outer edge of roads.

Date of Abatement: August 25, 1980  
*by 8/30/80* *9-12-80*

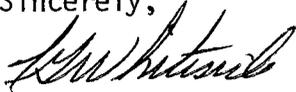

Also in your letter, you requested that plans be submitted to the Division which addressed runoff and sediment control. In lieu of this, may I suggest that you visit the site and observe what measures have been implemented and discuss any further activities which you may feel may be required.

Mr. Wayne Hedberg

If I do not hear from you objecting to this procedure, I will look forward to handling the "plans" portion of your letter as mentioned above.

If you have any questions, please call upon me.

Sincerely,

Trevor G. Whiteside  
Senior Mine Engineer
