INSPECTION REPORT COMMENTS

Permit No. ACT/007/022

Inspection Date 3/25/87

Please number comments to correspond with topics on previous page.

1 PERMITS: NPDES Permit expired 12/31/86. Request made & EPA authorization by letter 12/4/86 to continue all operations on an interim basis until new permit can be granted. Expired and interim permit is based on washing coal & does not permit discharge. Beaver Creek Coal Co. current plans do not include washing coal. BCCC has a change to the NPDES permit to allow requested discharge of water, ~~concurred in by DOGM~~, from disturbed area. No discharge was observed.

4 SEDIMENT PONDS & Impoundments - Sediment ponds are to be cleaned, slopes dressed and drainage ditches cleaned according to Dan Guy. Culvert on road, adjacent to pump house, NE end of the property was crimped; however, opening sufficient to pass discharge between ponds. Dan Guy at the closeout instructed the site mgr to reshape the culvert orifice.

13 Revegetation. Test plots shall be established on the SW portion of the refuse pile this spring. Dan Guy said they are thinking of the following possibilities: (1) Soil from top soil area (2) soil from top soil area mixed with refuse waste in two different quantities. He said they were hopeful that the refuse waste may improve the reveg chances on the heavy clay/shale soil.

Copy of report mailed to Dan Guy (BCCC), Donna Griffen (OSM)

Copy of report given to Joe Helfrich
