Form MR-REV-att (DOGM – Revise/Amend Change Form)
(Revised September 14, 2005)

Application for Mineral Mine Plan Revision or Amendment

Operator: Lakeview Rock Products, Inc

Mine Name: UDOT Beck Street Quarry

File Number: M/ 011 /0003

Provide a detailed listing of all changes to the mining and reclamation plan that will be required as a result of this change. Individually list all maps and drawings that are to be added, replaced, or removed from the plan. Include changes of the table of contents, section of the plan, pages, or other information as needed to specifically locate, identify and revise or amend the existing Mining and Reclamation Plan. **Include page, section and drawing numbers as part of the description.**

NOTICE OF INTENTION TO COMMENCE LARGE MINING OPERATIONS

The informational requirements in this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, General Rules and Rules of Practice and Procedures.

This form applies only to mining operations which disturb or will disturb more than five acres at any given time.

"MINING OPERATIONS" means those activities conducted on the surface of the land for the exploration for, development of, or extraction of a mineral deposit, including, but not limited to, surface mining and the surface effects of underground and in situ mining, on-site transportation, concentrating, milling, evaporation, and other primary processing.

"Mining operation" does not include: the extraction of sand, gravel, and rock aggregate; the extraction of oil and gas as defined in Chapter 6, Title 40; the extraction of geothermal steam; smelting or refining operations; off-site operations and transportation; or reconnaissance activities which will not cause significant surface resource disturbance or involve the use of mechanized earth-moving equipment such as bulldozers or backhoes.

PLEASE NOTE: *This form is to be used as a guideline in assembling the information necessary to satisfy the Large Mining Operations Notice of Intention requirements.* ***You will need extra space to provide a majority of the information requested.*** *Please provide the information on additional sheets and include cross-referenced page numbers as necessary. The Permittee / Operator may submit this information on an alternate form; however, the same or similar format must be used.*

II. Rule R647-4-105 - Maps, Drawings & Photographs

The proposed mining operation is to be located on a 48.35-acre parcel owned by UDOT. The parcel, located in North Salt Lake, is recorded as Davis County Parcel No. 011220004. The property extends into I-15 and U.S. Highway 89 and also includes a portion of the frontage road east of the highway corridor. Mining operations are proposed on the portion of UDOT's property located to the east of the frontage road. This area is about 40 acres and is generally described as the NE ¼ of the NE ¼, Section 14, Township 1 North, Range 1 West, Salt Lake Base

APPROVED
APR 25 2007
DIV. OIL GAS & MINING

and Meridian. The area of proposed mining operations is referred to herein as the UDOT Beck Street Quarry or simply "quarry" or "site."

The following maps and drawings have been prepared to show information relevant to the Notice of Intention:

Table 2 – List of Figures

Figure No.	Title	Notes
1	Site Location	
2	Property Ownership	
3	Base Map	See Table 3
4	Surface Facilities Map	See Table 4
5	Topsoil Management Areas	
6	Final Quarry Plan	Figure 6 shows reclamation treatments; see Table 5.
7	Quarry Cross Sections	
8	Soil and Rock Exploration	

105.1 - Base Map

A complete and correct topographic base map (or maps) with appropriate contour intervals must be submitted with this notice showing all of the items on the following checklist. The scale should be approximately 1 inch = 2,000 feet (preferably a USGS 7.5 minute series or equivalent topographic map where available). The map(s) must show the location of lands to be affected in sufficient detail to allow measurement of the proposed area of surface disturbance.

Base Map Checklist

Please check off each section to verify these features are included on the map(s) or explain why it is not applicable. Please add the map identification name or number which shows these features.

Table 3 – Base Map Checklist

Check	Map ID	Feature	Notes
		A	
	A1	Property boundaries of land to be affected by mining operations	
		B	
	B1	Perennial, intermittent, or ephemeral streams	The nearest streams are located in an unnamed canyon to the north and in Lime Canyon to the south.
	B2	Springs and other bodies of water	Based on a review of literature relating to other quarry operations along the Beck Street corridor, a number of springs are identified to the south and east of the site, including Lime Canyon Springs, Beck's Hot Spring, and Wasatch Springs. However, none of the springs is located within 500 feet of the site. Beck's Hot Spring is called out on the base map.

OIL GAS & MINING

X. PERMIT FEE [Mined Land Reclamation Act 40-8-7(i)]

The Utah Mined Land Reclamation Act of 1975 [40-8-7 (I)] provides the authority for the assessment of permitting fees. Commencing with the 1998 fiscal year (July 1 - June 30), ***and revised July 1, 2002,*** *annual permit fees are assessed to new and existing notices of intention and annually thereafter until the project disturbances are successfully reclaimed by the Permittee / Operator and released by the Division.*

Large mining permits require an initial submission fee and annual fee of $500.00 for surface disturbance of 50 or less acres, or a $1,000.00 fee for surface disturbance greater than 50 acres (see page six Section III, Rule R647-4-106.3 for estimated disturbance calculation). The appropriate fee MUST accompany this application or it cannot be processed by the Division.

PLEASE NOTE: If you are expanding from a small mining operation to a large mining operation, the appropriate large mine permit fee, less the annual $150.00 small mine fee (if already paid) MUST accompany this application.

XI. SIGNATURE REQUIREMENT

I hereby certify that the foregoing is true and correct. (Note: This form must be signed by the owner or officer of the company/corporation who is authorized to bind the **company/corporation).**

Signature of Permittee / Operator/Applicant:	
Name (typed or print):	Scott G. Hughes
Title/Position (if applicable):	President
Initial Submittal Date:	August 18, 2006
Final Submittal Date:	October 4, 2006

PLEASE NOTE: Section 40-8-13(2) of the Mined Land Reclamation Act provides for maintenance of confidentiality concerning certain portions of this report. Please check to see that any information desired to be held confidential is so labeled and included on separate sheets or maps.

Only information relating to the location, size or nature of the deposit may be protected as confidential.

Confidential Information Enclosed: ☐ Yes ☒ No

Attachment I

Vegetation Cover Sampling

Vegetation cover sampling determines the amount of ground that is covered by live vegetation. It is divided into four categories which equal 100 percent. They are:

Vegetation - This is the live perennial vegetation. Care should be taken to avoid sampling in disturbed areas that have a large percentage of annual or weedy vegetation, such as cheatgrass and russian thistle.

Litter - This is the dead vegetation on the ground, such as leaf and stem litter.

Rock/rock fragments - This is the rock and rock fragments on the soil surface.

Bare ground - This is the bare soil which is exposed to wind and water erosion.

Cover Sampling - The following methods are acceptable:

Ocular Estimation

This method visually estimates the percentage of ground covered in a plot by the four components. Plot size is usually a meter or yard square or a circular plot 36 inches in diameter. Ten to twenty plots should be randomly sampled in each major vegetation type.

Line Intercept

Percent ground cover is obtained by stretching a tape measure (usually 100') over the ground and then recording which of the four components is under each foot mark. At least ten of these transects should be randomly laid out and measured in each major vegetation type.

Soil Survey and Sampling Methods

If a Natural Resource Conservation Service or land management agency soil survey is not available, the Permittee / Operator shall delineate all soil types that will be disturbed by mining on a map. Each soil type shall be sampled for its characteristics and inherent properties. Representative sampling locations should have similar geologic parent material, slopes, vegetative communities and aspects. The sampling locations should be representative of the soil type and be identified on the map. Sampling shall be at a minimum of one for each soil type disturbed.

The soil map needs to be of sufficient scale so that each soil type can be accurately located on the ground.
