Minerals Program
Division of Oil, Gas, and Mining
1594 West North Temple, Suite 1210
Salt Lake City, Utah 84114-5801

Subj: Extension Request for Submitting Deficiency Responses for Task ID 1669, Miracle Rock Mining and Research, Rockland Mine, M/015/040, Emery County, Utah.

Miracle Rock Mining and Research, owner and operator of the Rockland Mine, hereby requests a 30 day extension to respond to the deficiencies outlined in the Division's fourth review document dated March, 12, 2007.

The permittee submitted the Notice of Intention to Commence Large Mining Operations for the Rockland Mine on August 15, 2006. The Division's review found deficiencies in this submittal. This deficiency document was received by Rockland Mine on or around November 13, 2006 and stated that the "Operator has an additional 60 days after submitting this response to ensure that it is approvable." The permittee submitted the plan on January 10, 2007. Currently, the permittee has until April 25, 2007 to submit responses to the Division's deficiency list.

Because of the scope of this project, Miracle Rock Mining and Research has acquired professional services of Mr. Dennis Oakley to develop a reclamation plan for the Rockland Mine. Mr. Oakley is an environmental engineer and has extensive experience in mine permitting and the development of reclamation plans. However, in order for him to become fully acquainted with this project and the mine site, additional time is necessary. This additional time will allow the delivery of a more complete and comprehensive plan to insure a successful project.

I assure you that Miracle Rock Mining and Research is doing what it can to comply with the Division of Oil, Gas, and Mining's requirements for the Rockland Mine. Your consideration to this request is greatly appreciated. If you have any questions or concerns regarding this request, please contact me at 435-286-2222.

Sincerely,

David Taylor
President
