INSPECTION REPORT COMMENTS

Permit No. PRO/007/033

Inspection Date 3/30/88

Please number comments to correspond with topics on previous page.

General Comments. Light snow the night before, most of which had melted resulted in the mine site being wet but not muddy.

John Pappas the operators representative in charge of the preparation plant stated that spring maintenance work will be undertaken in April.

Permit. Operator submitted the required permitting documents the end of December 1987. DOGM comments have been prepared and mailed the operator.

Signs & Markers. All signs and markers were observed. A topsoil marker adjacent to pond F needs to be reattached.

Diversions. Ditches while in compliance and functional are in need of cleaning. John Pappas said the grader is scheduled to be moved from the mine site in the next day or two.

Revegetation. With the approval of the permit, some areas will need to be seeded. Fall seeding undoubtedly would have the best chance for success.

Copy of report mailed to SLC-FOR-Brian Smith OSM; Joe Helfrich, DOGM
