 Division of Oil, Gas & Mining  
 1588 West North Temple  
 Salt Lake City, Utah 84116

RE: Powerline Survey

Dear Mr. Portle:

In response to your September 2, 1981, letter to Mr. Ed Foust concerning the above subject matter, contact with the Division of Wildlife Resources has been made. In discussing your suggestion with Mr. Larry Dalton, I was informed that an extensive powerline survey on all the mine properties in the area will be conducted by the Division of Wildlife Resources within the next few months. At such time, particular attention will be directed to the poles Mr. Foust identified as being "questionable", and the results of such an examination, as well as the overall survey results, will be forwarded to your office for evaluation.

I hope this approach will meet with your approval.

Sincerely,

T. G. Whiteside  
 Senior Mining Engineer
