Dear ~~Mr.~~ Rick Smith,

This letter is to inform the Division that Andalex Resources has questions relating to an undisturbed diversion structure located at the Wildcat Loadout Facility; PRO 007/033. Our plan shows that the area in question is to be serviced by undisturbed diversion UD-1, which effectively routes a natural drainage around the disturbed area. The problem lies in that the amount of disturbance created by construction of the west end of this diversion is more than was anticipated. We began construction of this diversion recently, and when this potential problem arose decided that we should consult your office before proceeding. Therefore, we are requesting a conference be held on site to determine the best way to proceed. Perhaps a hydrologist on your staff could shed light on this matter and hopefully there is a simple solution.

THank you for your consideration of this matter.

Sincerely,

Michael W. Glasson
Sr. Geologist
Western Division
