INSPECTION REPORT COMMENTS

Permit No. Act/007/033

Inspection Date July 7, 1992

Please number comments to correspond with topics on previous page.

General Comments. The loadout disturbed area and appurtenances were in good condition in spite of the recent rain storms. Its obvious the operator has been performing routine maintenance before and after recent storms. The site in general looks good.

Signs & Markers all required by regulation were in place. New signs have been installed on ponds A-F.

Diversions. The diversion between the tracks and office/coal pile that is subject to truck traffic and truck potential encroachment on the ditch needs to be watched to prevent the diversion from being a compliance problem. Some diversions near the refuse pile have been redefined.

Other Sediment Control. Operator during the inspection replaced one missing straw bale on the refuse and areas below pond B.

Road Surfacing. The haul roads were recently regraded and surfaced.

Support Facilities. All support facilities were observed and no problems noted.

Copy of report mailed to ARI/Mike Glassow; OSM/Brian Smith; DOGM/Joe Helfrich
