RE: Banning Access Road Designs, Division Order ACT/007/034-92B (received 10/1/92), Soldier Creek Coal Company, Banning Loadout, ACT/07/034-92B, Carbon County, Utah

SUMMARY:

Division Order Part #1:

1. The submittal did not address the requested items noted in the Division Order. The application does present revised right of way information from the BLM, however, the demonstration of compliance for R645-301-741 and 742 et. seq. was not addressed.

Division Order Part #2:

1. The submittal references a nomograph to demonstrate adequate culvert sizing. It appears as if the nomograph was not included in this submittal.

2. The submittal does not address road diversion designs. The plate labeled "Proposed Haulage Road" presents a cross-section of the road with a 2 ft. drainage pit on either side of the road. Designs for these diversions should be presented.

3. The culverts should be given an identification label and that label used in the design section to identify the culvert designs.

4. The culverts should be depicted on an updated road map or otherwise applicable exhibit.

These deficiencies were discussed via telephone with Dave Spillman of SC3 on November 18, 1992. They were forwarded to Mr. Spillman via fax on that same day in order to expedite the response time for resubmittal.
