Field Supervisor
U.S. Fish and Wildlife
Room 2060
Administration Building
1745 West 1700 South
Salt Lake City, Utah 84104

Dear Field Supervisor,

I am writing to request a Species List to be used in a Threatened and Endangered Species Review for a parcel of land located in Carbon County, Utah, which is located in the southern half of Section 6 and the northern half of Section 7 , Township 15 South, Range 14 East, Salt Lake Base and meridian. I have included a site map which outlines the property which in question. The property lies southeast of East Carbon City.

I am currently working with the Utah Division of Oil, Gas, and Mining (DOGM) preparing a Coal Mine Permit. The last Threatened and Endangered Species Review was done in 1981. Susan White with DOGM requested that an undated review be performed.

In the past the site has been used as a coal refuse disposal area by Sunnyside Coal Company (SCC). Sunnyside Cogeneration Associates (SCA - no relation to SCC) proposes to use the coal refuse as a long-term supply of waste fuel for its coal mine waste-to-energy facility, located adjacent to the site.

If you have any questions please feel free to give me a call at 261-0090. Thank you for your time.

Sincerely,

Alane E. Boyd
