RE: Additional information  
 concerning the ACR  
 ACT/007/001  
 Carbon County, Utah

Dear Trevor:

Enclosed is an additional item requested by you over the phone on December 14, 1981. The United States Geological Survey Completeness Review was copied from a very illegible carbon forwarded to us from their office. If you cannot make it out, I suggest you contact Jack Moffitt in the Salt Lake City office for a copy of the original. Forest Service comments have been included for your reference.

As discussed with you on a December 16, 1981, phone conversation, I am anticipating a statement addressing Stipulation #4 applied to the Division's June approval for entry into county coal leases in the Belina #2 mine. As you may recall, I suggested that we need to be advised as to whether any new culverts have been installed since the interim plan approval was given and whether the design specifications for these have been submitted as part of the overall mining and reclamation plan. I am to expect a map of these locations as soon as you are able to have it drafted.

As of this date, the Division is awaiting response from the Office of Surface Mining and the United States Geological Survey regarding your request for regulatory approval to extend development and production of coal from Belina No. 2 Mine into federal coal.

  
 THOMAS N. TETTING  
 ENGINEERING GEOLOGIST
