INSPECTION REPORT COMMENTS

Permit No. Act 007/035

Inspection Date 9/14/95

Please number comments to correspond with topics on previous page.

Partial Inspection was completed on 9/14/95.

Permit. EWP/Permittee submitted the second permit package to the Division. This is in response to permit deficiencies.

Signs & Markers. The I.D. signs have been updated showing the required information. The new signs had to be changed because of the address change.

Spoil Pile. The outslope of the spoil pile needs to be seeded this fall.

Revegetation. The outslope of the refuse pile revegetated/seeded last fall was observed. The favorable spring resulted good growth of the seeded species.

An inordinate density of volunteer clover was observed in the east slurry cell.

Roads. Roads were recently graded. It is necessary to crown/graded the haul roads to improve road drainage.

EWP pointed out how road grading can be improved. The report prepared by Jim Comas was given to Mr. Mattingly, the plant manager.
