SUBJECT: Explanation of Acreage Discrepancy on Cont. Lime Surety Package

DATE: 10/27/93

The 10/15/93 Board package indicates that 169 acres of disturbance is being permitted for on the Board memo and the Reclamation Contract; however, the surety firm and the surety estimate indicate that the acreage covered by surety equals 147.7 acres. The difference is explained by 26 acres of the 169 acres, of disturbance, that will not be reclaimed. The 26 acres includes: portions of the quarry area and a portion of the haul road (from first switchback to the intersection with the BLM road). The 26 acres are not included under the surety.
