Re: Exploration Permit Modification, Cyprus Plateau Mining Corp., Blackhawk Exploration Project, EXP/007/038-94C, Folder #3, Carbon County, Utah

Dear Mr. Grimes:

The Division has completed a review of your recent modification to exploration permit EXP/007/038 which involved drilling 15 test holes for the collection of information on soil types and bearing strength. Before the Division can approve your modification, there are a couple of areas that need additional information. The following information must be submitted.

1) An updated disturbed area map showing all disturbance caused by exploration, including the test hole activities.

2) Calculations must be submitted to support the sizing of the catch basins as being adequate for sediment control. These calculations should be P.E. Certified.

3) The modification should be formatted for insertion to the previously approved exploration plan that is on file with the Division.

Upon satisfactorily complying with the above requirements your modification may be approved. Please submit a response by November 18, 1994. If you have any questions, please contact me or Steve Demczak.

Sincerely,

Daron R. Haddock

Daron R. Haddock
