Re: Mining & Reclamation Plan Information

Dear Pam:

I appreciated your phone call a couple of weeks ago concerning the information that this Division would like to receive regarding any new mine and reclamation plans, or permit renewals on existing plans. In trying to determine what information would be helpful in our review, I have taken the Table of Contents from the Willow Creek Mine and crossed out the sections I do not believe we would need.

Once you have had an opportunity to review the Table of Contents that is enclosed, if you have any particular questions, or if I have not understood the material in a particular section, or if you think I may or may not need it, please call and we can work out a specific plan.

Again, let me express our appreciation from the Division of Water rights to you and your staff for your willingness to keep us informed concerning these matters, and hopefully we can be of assistance to your Division as well.

Sincerely,

Mark
