RE: Sedimentation Pond No. 3
Modification Review

Dear Mr. Summers:

Pursuant to your request of November 26, 1982, regarding additional design information on the subject pond, please refer to our Mine Plan Permit Application, the Compliance Survey by Vaughn Hansen Associates - copy in your office - and the September 11, 1981, Valley Camp correspondence with enclosures for the desired information.

As far as proposed methods for keeping the coal out of the pond, we have changed the configuration of the pond at the north end to allow for additional coal storage area. Also, we will make every effort to keep coal from entering the pond.

If I may be of further assistance, please call on me.

Sincerely,

T. G. Whiteside
Chief Engineer
