RE: Wastewater Treatment Plant
Effluent Data

Dear Mr. Pappas:

We appreciated receiving the January through August 1982 sanitary wastewater treatment plant effluent data for the Valley Camp Belina Mine. This data indicates that the plant is not producing an effluent of sufficient quality for uses which may result in direct exposure to the workers.

We request that all monitoring data for August 15 through November 30 be submitted at this time and that all future data be submitted to this office on a monthly basis. Information should include wastewater flows and disposal location as well as BOD, TSS, pH, total coliform and fecal coliform data.

If you have any questions, please feel free to call Steve McNeal or myself at the above number.

Sincerely,

Fredrick C. Pehrson, P.E., Chief
Permits and Compliance Section
Bureau of Water Pollution Control
