To whom it may concern:

I received the invitation for bid for the AMV road reclamation. After reviewing the information, I noticed that none of the changes that Thayn Trust discussed with Mr. Spillman and DOGM were present. I should have formalized my requests in writing. The proposal as is does not meet the desire and best use of the land owner. Consequently, Thayn Trust requests that some modifications be made. 1) That an access trail or small road needs to be incorporated into the remaining portion of the AMV road, similar to the one on G-16 and G-22 road. This will allow for better weed control and better access for our cattle operation. 2) A water collection and water trough be placed along the AMV road for weed control, wildlife and livestock. 3) The three lower culverts should be retained and there should be access to maintain the inlets. This area's terrain is very steep and we believe culverts would be the best solution.

Best regards,

David Thayn
