Memo to Coal File:

ACR Review  
Valley Camp  
Belina Complex  
ACT/007/001

A phone call of June 4, 1982, from Tom Tetting of the Division to Ed Foust at Valley Camp, was made in response to the May 26, letter received on June 1. After consultation with Sarah Bransom, the T.P.O. at the Office of Surface Mining, it was determined that Valley Camps request for extension of a May 31, 1982, deadline for the ACR response submittal was reasonable and should be approved. The ACR response will be delivered by Ed Foust on or before June 14, 1982. This material will be complete except for a section on geology which will be submitted by mid July. An explanation that this was caused by the necessitated generation of many new maps was given as the reason.

THOMAS N. TETTING   
ENGINEERING GEOLOGIST

# VALLEY CAMP OF UTAH, INC.

Scofield Route

Helper, Utah 84526

26 May 1982

Mr. Tom Tetting  
Division of Oil, Gas & Mining  
4241 State Office Building  
Salt Lake City, Utah 84114

Dear Mr. Tetting:

This letter is to advise you, per your request by phone on 21 May 1982, that there is a very good probability that Valley Camp of Utah, Inc. will not have the ACR complete by 31 May 1982.

There are three major areas of delay:

1. Geology - a consultant has been hired as of April 1, and will not be finished with his study until July of 1982; it is proposed to send this information and further clarification as requested, in July of this year.
2. Support documentation for the area of:  
  
UMC 783.27 - Prime farmland investigation - a letter from the Soil Conservation Service has not been received at this time.
3. Completing - In that most of the drawings and reports have come to this office after the week of May 17, 1982, the physical task of sorting and assembling of this material is time consuming and preponderate to the staff available at this location.

This letter is a form of request as to how you wish the information to be sent; that is, do you want for us to wait for the information requested and send you a complete ACR, or do you want us to send a partial ACR with updated material as we receive it. We should be able to send all of the material except the geology by the week of June 14, 1982.

**RECEIVED**

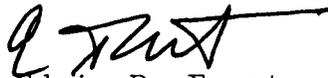

JUN 01 1982

DIVISION OF  
OIL, GAS & MINING

*fine by OSM.*  
*geology section by mid July -*  
*MM.S. contacted and reassured.*

Mr. Tom Tettīng  
26 May 1982
