PUBLIC NOTICE

WEST RIDGE Resources, Inc., P.O. Box 902, Price, Utah 84501 has filed a complete application with the Division of Oil, Gas and Mining for a permit to conduct underground coal mining and reclamation operations in eastern Carbon County, Utah. The proposed West Ridge Mine would be located in C. Canyon, approximately 6 miles north of East Carbon City, Utah. The proposed permit area is approximately 2,661 acres and delineated on U.S.G.S. 7 1/2 minute topographic maps as follows:

T 14 S, R 13 S

Section 10: NE1/4, N1/2SE1/4, E1/2NW1/4, SE1/4 SE1/4
Section 11: All
Section 12: S1/2SW1/4, NW1/4SW1/4
Section 13: W1/2, SE1/4, S1/2NE1/4, NW1/4NE1/4
Section 14: E1/2, N1/2NW1/4, SE1/4NW1/4
Section 15: NE1/4NE1/4
Section 16: NE1/4SE1/4 (9.6 acres)
Section 24: N1/2SE1/4, NE1/2, NE1/4SW1/4

A portion of the mine facility area would be located within 100 feet of a Carbon County public road. There are no plans to relocate or close the public road. The mine facility would not hinder public travel on the public roadway.

An experimental practice with regard to topsoil removal and storage is being proposed on approximately 4.75 acres of the total 29 acre mine facility area. The regulatory provision for which the variance is being requested is R645-301-232. Details of the proposal are included in the Permit Application Package currently on file with DOGM.

Following mining activities, all surface facilities would be removed and the area regraded to approximate original contour. The disturbed surface area would be seeded and mulched to promote successful revegetation. Postmining land use would be the same as currently, exists today, that being wildlife habitat, grazing and limited recreational activities.

A copy of the application is available for public inspection at the following locations:

Division of Oil, Gas and Mining
1594 W. North Temple, Suite 1210
Salt Lake City, Utah 84114-5801

Carbon County Courthouse
120 East Main
Price, Utah 84501

Written comments, objections or requests for informal conferences on the application may be submitted within 30 days to:

not call the error to our attention. Thank you.

NOTICE OF PUBLIC HEARING
Lead-Based Paint Abatement Program
DAQSN-0154-98

The Air Quality Board proposes a new rule to implement SB118 from the 1998 legislative session, establishing a lead-based paint certification program in Utah. Upon final adoption of the rule, the state will seek authorization from EPA to administer and enforce the standards, regulations and other requirements established under the Toxic Substances Control Act section 402. Nothing in the rule requires anyone to abate or remove lead-based paint. The rule specifies training and work practices.

The rule, R307-840, specifies purposes and applicability in Section 1. Section 2 incorporates by reference the federal provisions with appropriate substitutions and modifications for state enforcement. Fees will cover part of the cost and a federal grant will cover the remainder. As provided in Utah Code 63-38-3.2(5)(a), Section 3 sets forth a fee schedule for the first year of the program. In future years, fees will be determined by the Legislature. Individuals or companies who conduct lead abatement activities will be required to pay for training and certification, just as they would if the program were operated by the federal government.

The Board also proposes to add a new subsection R307-1-2.5.1.F to provide, as required by Utah Code 63-46b-4, that any hearings or other proceedings pertaining to R307-840 shall be conducted informally.

A public hearing to receive comments on the proposed rule, the proposed fee schedule and on the Department's intention to seek EPA authorization to administer and enforce a lead-based paint program in Utah will be held on June 4, 1998, at 1:30 PM in Room 201 at the Department of Environmental Quality Office, at 168 N. 1950 West in Salt Lake City.

In compliance with the Americans with Disabilities Act, individuals needing special accommodations (including auxiliary communication aids and services) during this hearing should notify the Bureau of Human Resources at 168 North 1950 West, Salt Lake City, or call 536-4413 at least three working days before the meetings.

Electronic copies of the rule will be available May 15 at: http://www.rules.state.ut.us. Printed copies of the proposed rule are available at the Division of Air Quality, Davis County Library, the Salt Lake City Main Library, Salt Lake County Library (Whitmore), Provo City Library, the Bear River District Health Department in Logan; the Uintah Basin District Health Department in Vernal; the Central Utah District Health Department in Richfield; the Southeastern District Health Department in Price; the Southwest District Health Department in Cedar City; the Summit City/County Health Department in Coalville; the Tooele County Health Department, Wasatch County Health Department, Salt Lake City/County Health Department, Davis County Health Department, Weber-Morgan District Health Department, City-County Health Department of Utah County. The comment period closes at 5 p.m. on June 15, 1998. Comments postmarked on or before June 15, 1998, will be considered. Both written and oral comments will be accepted and considered equally.

Written comments regarding the charges may be mailed directly to:
