RE: Determination of Completeness
and Technical Deficienices
Western States Minerals Corp.
J. B. King Mine
ACT/015/002, Folder No. 2
Emery County, Utah

Dear Mr. Klein:

Enclosed please find a copy of the Division's Determination of Completeness and Technical Deficiencies for the above-referenced State mine, for your records.

As you will note, there are several areas which will require additional information from the applicant before the Division can determine the plan complete and proceed with the Technical Analysis (TA). Though the applicant, in good faith, submitted the response to the Apparent Completeness Review (ACR) in September 1983, the Division's priorities have placed repermitting of active operations ahead of the continued review of this temporarily suspended operation. Thus, the Division feels it is only appropriate to give the applicant some additional time for preparing an adequate response to the deficiencies as noted in this document. Therefore, the applicant will be required to submit the necessary information by April 6, 1984 and the Division will delay preparation of the draft TA until April 27, 1984. This delay should not affect the deadline of June 1, 1984 for preparation of the Final TA.

Should you or your staff have any questions regarding the review schedule for this MRP or contents of the enclosed document, please contact the Division at your earliest convenience.

Sincerely,

James W. Smith, Jr.
Coordinator of Mined
Land Development
