CORPORATION

Copy for PAM, Susan, Jesse, Tom
File ACT/015/004 #2

September 30, 1991

Ms. Pamela Grubaugh-Littig, Permit Supervisor
Utah Department of Natural Resources
Division of Oil, Gas, & Mining
355 West North Temple
3 Triad Center, Suite 350
Salt Lake City, Utah 84180-1203

Dear Ms. Grubaugh-Littig:

Re: STIPULATION RESPONSE, WESTERN STATES MINERALS CORPORATION, J.B. KING MINE, ACT/015/002, FOLDER #2, EMERY COUNTY, UTAH.

In response to your letter dated August 15, 1991 regarding the two remaining stipulations (1. R614-301-120 and R614-301-140 (JK), 2. R614-301-742-113(TM), Western States Minerals Corporation (WSMC) proposes the following action:

Stipulation R614-301-120 and R614-301-140(K)

In regard to modification of Map JBK-1 " Reclaimed Topography and Disturbed Area" to include the cut slope high walls, WSMC proposes the relocation of disturbed area markers 3 and 4, and 5 and 6 to higher elevations. To accurately relocate these markers to address the concerns of the State of Utah, Division of Oil, Gas and mining, WSMC requests that a representative of your department meet us on site when the disturbed area markers are relocated. In addition, existing erosion control devices and any erosional features would be inspected during the site meeting. WSMC believes that additional disturbed area markers may be necessary to better define the cut slope high wall area. Locations of the new markers will be surveyed promptly by a licensed professional engineer in the State of Utah in coordination with our annual subsidence monitoring. WSMC proposes to meet with a representative of the Utah Division of Oil, Gas and Mining between now and October 15, 1991. A revised map of JBK-1 showing the new locations of the disturbed area markers will be submitted by October 31, 1991.

Stipulation R614-301-742-113 (TM)

In regard to the requirement that WSMC submit an "erosion control Schedule" for the JB King Mine we propose the following schedule: By 16 November, 1991 the data collection period will end and a proposal of erosion control measures will be submitted for approval to the Division. Upon approval from the State of Utah a schedule showing the implementation of field actives will be developed. While developing an erosion control plan WSMC will continue to maintain existing silt fences and perimeter drains. Currently WSMC is assessing the effect of September thunderstorms at the subject property.

84 Glen Carran Circle • Sparks, Nevada 89431 • (702) 358-3339 • FAX (702) 358-3660

In closing, we would appreciate your assistance in establishing the new disturbed area boundary markers. During the week ending October 4, 1991 I will contact your office to arrange a site meeting.

If you have further questions, please call me,

Sincerely,

Larry Berg for:

Dwight J. Crossland
