 Envirosphere Company
 1617 2nd St. N.E.
 Suite 200
 Golden, CO 80401

#2

Dear Sir:

Enclosed are the following materials for your use in the review of Valley Camp's Mining and Reclamation Plan: 1) the Crandall Canyon Mine Decision Package, 2) a letter from Valley Camp to Minerals Management Service (MMS) containing a cross-reference index, and 3) the MMS comments on Valley Camp's November, 1982 revision to their mine plan. I have requested from Tom Tetting, Utah Division of Oil, Gas and Mining, another copy of the company's November, 1982 submission and will forward it to you as soon as possible. In the meantime, you are welcome to use OSM's file copy available in our office.

In reference to your January 13, 1983 letter, I understand that Envirosphere has initiated the TEA, but will not produce the full document until Valley Camp has completed its mine plan. In light of Valley Camp's continued problems in completing the mine plan, please be advised that OSM reserves the right to request and obtain from Envirosphere all interim working drafts, field notes and other related materials in the event the mine plan is not completed within a reasonable amount of time. I will inform you of any pending decision regarding this matter.

If you have any questions, please call.

Sincerely,

Sarah E. Bransom

Denver, CO 80202

Dear Sarah:

Re: Progress Report, December 1982
Belina Complex Review

In December, Envirosphere received Valley Camp's responses to the preliminary ACR questions. Based on these responses the final ACR was prepared and submitted on December 10. Since some portions of the MRP were still incomplete, no work was initiated on the TEA. We understand that the MRP will not be complete until April 1983. We will perform portions of the TEA in the interim, but no document will be available until after the MRP is complete.

If you have any questions, please call.

Sincerely,

Robert S. Lytle
