RE: Sedimentation Pond No.3 Relocation Review.

Dear Mr. Summer:

Enclosed you will find the relocated sedimentation pond plans which involve constructing a new pond adjacent to the existing pond and filling the old pond with the excess cut material from the Haul Road construction area.

Construction is expected to begin by May 23, so your assistance in reviewing this plan is greatly appreciated.

As you requested from our April 29th meeting, I have reviewed the file on the existing pond, and have the following comments.

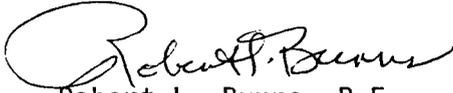

A prior letter to you from Trevor Whiteside of Valley Camp of Utah dated December 8, 1982, refers to several documents which answer your questions in a letter dated November 26, 1982.

1. Information regarding the disturbed and/or undisturbed area which currently drains into Sediment Pond No.3
2. The storm volume and sediment volume calculations.
3. Question 3 through 5 did not apply to the relocated pond as we discussed.

I have enclosed copies of a portion of the compliance survey by Vaughn Hansen Associates, (pages 70 to 82, and pages 120 to 129), which has all the information you requested. Please review this plan as soon as possible because our

construction season is very short in the Scofield area.

Sincerely,

A handwritten signature in cursive script that reads "Robert L. Burns". The signature is written in black ink and is positioned above the printed name.

Robert L. Burns, P.E.
Branch Manager
