Memorandum

To: Regional Director, Office of Surface Mining, Denver

From: District Mining Supervisor, USGS-CD, Salt Lake City

Subject: ARCO Coal Company, Beaver Creek Coal Company, Huntington Canyon No 4 Mine, Carbon County, Utah, Underground Coal Mining Permit Application and Mining and Reclamation Plan

The subject "permanent program submission" forwarded by your letter dated March 27, 1981, and received in this office on March 30, 1981, has been reviewed for completeness and technical adequacy pursuant to the cooperative agreement between our offices and for conformance with the Federal regulations 30 CFR 211.10 (c), dated May 17, 1976, as amended August 22, 1978. The following are our comments:

1. The plan has been assembled using the Utah State general guidelines (revised November 3, 1980) for organizational format and content for a 5-year permit application and mine plans. It does not contain all the information required by the USGS regulations 30 CFR 211.10 (c). The submittal should be supplemented with an approved USGS 211 mine plan that is updated to conform with this submittal or provide the parts that are missing to comply with 30 CFR 211.10 (c) dated May 17, 1976. If the latter method is selected a cross reference index must be provided that designates the sections and pages or maps which contain the 30 CFR 211.10 (c) requirements. The cross reference index should follow the format of the attached memorandum that lists in order the pertinent regulations related to USGS responsibilities for coal resource recovery.

With either option (supplement with updated 211 mine plan or amend by furnishing missing information, including cross reference index), the company should furnish all agencies involved in the permitting process with the appropriate number of copies.

Jackson W. Moffitt
