RE: Construction Permit
Belina Mine Water Settling Basin

Dear Mr. Whiteside:

We have reviewed the plans and information regarding the Valley Camp of Utah Belina Mine settling and filter basin. Plans D4-0080 through D4-0082 and information submitted June 16, 1983 were reviewed. As a result, this letter constitutes our construction permit for the basin.

The concrete basin is to be 145 feet long, 20 feet wide and 10 feet deep. The 118,000 gallon capacity is to provide approximately eight hour retention at a 250 gallons per minute mine water flow rate.

In addition the plans for the flow measuring device should be submitted to this office. If the system fails to meet state or federal standards additional treatment must be provided.

Sincerely,

UTAH WATER POLLUTION CONTROL COMMITTEE

Calvin K. Sudweeks
