Re: Technical Deficiency Review

Dear Mr. Smith:

Under separate cover, please find thirteen (13) copies of Valley Camp's response to the "Technical Deficiency Review" of the original mine permit submittal of February, 1981.

Complete responses for the following sections could not be provided during the time period allowed. The information not submitted at this time, as indicated below, will be submitted as soon as it can be obtained. This should be by October 17, 1983.

1. UMC 783.15 Ground Water Information

Required: Specific geologic cross sections showing both faults and the dike in the permit area.

2. UMC 817.101(b)(4)(iii) Backfilling and Grading: General Requirements

Required: Results of geotechnical mapping and drilling program for determining slope stability.

3. UMC 784.13(b)(4) Reclamation Plan: General Requirements (Topsoil)

Required: Analysis of site material proposed for topsoil substitute.

Mr. James W. Smith, Jr.

Page 2

4. UMC 784.15 Reclamation Plan: Post-Mining Land  
Uses

Required: Support letters from UDOGM, UDWR,  
and USFWS

5. UMC 784.24 Transportation Facilities (Belina  
Haul Road and Proposed Conveyor)

Required: As built drawings of Belina haul  
road

Copies 1 through 6 have been assigned to the Division and  
copies 7 through 13 should be transmitted on to OSM.

If you have questions concerning this submittal, please  
feel free to contact me.

Sincerely,

T. G. Whiteside  
Chief Engineer
