RE: Field Amendment and Subsequent Submission Beaver Creek Coal Co., Huntington #4 Mine ACT/015/004 -88C

Synopsis of Proposal Maintenance work was identified in routine inspection reports. Operator has successfully completed all field work. Two areas are involved and the work is highlighted below:

Area	Maintenance Work			
	Regrade	Seed, Mulch & Fertilize	Sed. Control	Other
Upper Pad (Item 1)	No	Areas where vegetation was sparce	Install new Silt fence	
Lover Pad Upperbench (Item 2)	Yes roughed up site, cut new ditch	Yes	Check dams & depressions	
Item 3	No	No	No	Cleaned sed. pond

Recommendations Maintenance work as sketched on the field amendment, observed in the field, and more particularly described in Beaver Creeks submission of 12/12/88 is recommended for approval.

Other Comments Whether or not such work should be considered, an amendment is open to question. Items 1 & 3 are nothing but follow-up maintenance work following the current plan. Item two is perhaps the most noteworthy. A new 600 ft. ditch and minor regrading was performed. When compared with the level of detail in the existing plan, this is not significant in the opinion of the undersigned. This item is brought to your attention as a point of discussion, for your consideration and feedback as you deem appropriate.
