INSPECTION REPORT COMMENTS

Permit No. ACT/015/007

Inspection Date 5 ~~January~~ February 1992

Please number comments to correspond with topics on previous page.

4. HYDROLOGIC BALANCE

(b) Diversions-- All diversions are in good repair and free of debris.

13. REVEGETATION

The entire site is damp from melted snow. Vegetation is sparse, especially on the seam fills, but it seems to have gotten a moderate start.

NOV N91-26-8-2 of 2, which was written November 22, 1991, deals with the Permittee's failure to seed and vegetate the pad outslope adjacent to Ivie Creek.

17. OTHER TRANSPORTATION FACILITIES

For this inspection, the site was accessed on foot by way of the prelaw access road along Ivie Creek. Happily, this road, which was used very little, is completely covered with natural vegetation and has been obliterated by the elements to the point that it is, for the most part, almost invisible against the surrounding topography.

2) Signs and Markers - NOV 92-25-1-1 was issued regarding stream buffer zones. As an abatement to this violation the operator must submit an amendment to comply with R645-301-731.620, marking the buffer zone as specified in R645-301-521.260.

4. (a) Stream Channel Diversions - The stream channel diversion bisecting the two pads appeared stable and capable of functioning well in a storm event.

(d) The silt fences throughout the property appeared to be in good repair, but based on the winter snows, ~~and~~ it was difficult to ascertain completely to what extent ~~[illegible]~~ the toes of the fences were keyed in. The operator per the requirements

4e) The surface water monitoring records for Dive Creek have been inspected. Samples are taken bi-annually and the fall samples were taken on 9/25/91 and submitted to the lab on 9/27/91. The operator is to be made aware of a the letter regarding sampling protocol sent to all operators on October 30, 1991. The spring samples (1992) must reflect this new protocol regarding data presentation.

13) Revegetation - NOV N91-26-8-2 was issued on November 22, 1991. On December 20, 1991 an informal hearing was held concerning the fact of violation. The Division based on Conclusions of Law upheld revegetation of the fill slopes associated with the road and the fill slopes of the pads, except with respect to the
