Phoenix, Arizona 85034

Dear Mr. Edmonson:

Re: Division Order 92B, Hidden Valley Coal Company, Hidden Valley Mine, ACT/015/007-DO-92B, Folder #2, Emery County, Utah

The December 17, 1992 response to Division Order 92B regarding the status of drill holes in the Hidden Valley Mine reclamation plan has been reviewed. Division action is being deferred on drill holes 1, 2, 3 & 7 because the issue of a time extension to submit proof of beneficial use is currently pending with the State Engineer. The Division requests that Hidden Valley Coal Company provide a copy of the State Engineer's final notice regarding the request for extension within ten days after receipt of such notice from the State Engineer.

During the 1993 field season, a Division hydrologist and a representative of the Hidden Valley Coal Company must conduct a field examination to verify that drill holes 4, 5, and 6 have been sealed. Your representative will be notified in advance of this field examination.

Hidden Valley Coal Company must update the reclamation plan with the supporting documents submitted December 17, 1992. Other documents that entail the verification of sealing for drill holes 4, 5, and 6 and the time extension for drill holes 1, 2, 3, and 7 must be submitted within 30 days of field verification and ten days after receipt of notice from the State Engineer, respectively.

If you have any questions, please call me.

Sincerely,

Pamela Grubaugh-Littig
Permit Supervisor
