Inspection Memo to
Coal File

RE: Valley Camp of Utah, Inc.
ACT/007/001, Folder No. 7
Carbon County, Utah

On August 26, 1983 DOGM Field Specialist, Ken Wyatt, conducted an inspection at the Belina Mine Complex. Ed Sanderson of Valley Camp accompanied this inspector during the field tour. The purpose of this inspection was to collect a water sample of the sediment pond discharge in relation to Cessation Order C83-1-1-1. This sample was collected at 12:45 pm. The flow at this time was estimated at approximately 230 gallons per minute. The results of analyses for this sample indicated TSS levels at 11 mg/l. This value indicated compliance with TSS limitations therefore Cessation Order C83-1-1-1 was terminated subsequent to the Division's receipt of these lab results. No other compliance problems were encountered at this time.
