INSPECTION REPORT COMMENTS

Permit No. Act 015/007

Inspection Date 4/18/96

Please number comments to correspond with topics on previous page.

General Comments. Performed this inspection after the normal tour of duty. A general storm hit the area while I was at the mine site. No compliance violations were issued as a result of this inspection. The maintenance work outline in the last inspection was checked and such environmental control measures were functional

Signs & Markers. The I.D. sign and disturbed markers were observed and currently are consistent with Utah Coal Rules performace standards.

Other Sediment Control. Siltfences and contour furrows that provide sediment control as a supplement to ground cover were functional

Support Facilities. The drift fence in upper and lower Ivie Creek, as referenced to the Hidden Valley Mine were in a acceptable condition as related to protecting the area from livestock grazing. No cattle were observed in the enclosed reclaimed disturbed area
